EDUCATION

Bachelor of Science in Computer Science New Era University

09/2020 - 08/2024

Quezon City

Information and Communication Technology New Era University

09/2018 - 07/2020

Quezon City

THESIS/PROJECTS

Hospital Management System

- Created in Java and connected to MySQL. An OOP Project that will replace the traditional data management system in hospitals.

Road Safety Enhancement System

- An Advanced RNN Model for Real-time Drowsiness Detection via Posture Landmarks Integration.

WORK EXPERIENCES

Human Resources Internship San Miguel Integrated Merchandising Services Inc.

09/2023 - 11/2023

Achievements/Tasks

- Experienced in file management and Microsoft Excel, with a focus on handling HR-related data and tasks.

Data Science Internship SM Investments Corporation - Datalabs

12/2023 - 03/2024

Achievements/Tasks

- Web scraping and Open-Source Intelligence (OSINT) techniques for gathering and analyzing data. We are experienced in creating data pipelines, automating workflows using APIs, and developing dynamic data visualizations to present insights effectively.

Network Specialist T.I.P QC - Cubao

01/2025 - Present

Achievements/Tasks

- Network Problem Assistance, Configuration of ISP for the fair distribution of bandwidth, Firewall configuration to custom-fit the needed security for the campus, and ensuring the stable ISP

SKILLS

Cybersecurity

Information Security

Web Scraping

Data Science

Data Analysis

Offensive Security

Problem Solving

Microsoft Office Tools

Software Engineering

Quality Assurance Testing

Threat Hunting

Network System

ORGANIZATIONS

Association of Computer Science Students (NEU)

Student Relations Member

Christian Family Organizations (INC)

KADIWA Organization President

CERTIFICATES

Summer Pre-Kindergarten Program Para-teacher

Served as a Para-teacher in a Summer Pre-Kindergarten Program of New Era University, assisting lead teachers in classroom management, supporting early childhood learning activities, and helping young students develop foundational skills for school readiness.

LinkedIn Deep Dive into Open-Source Intelligence

The course covered advanced search techniques for efficiently locating public data, methods for extracting and analyzing profile information, and strategies for mapping out professional networks. I learned how to leverage LinkedIn's vast data to identify patterns, relationships, and potential intelligence leads, enhancing my ability to gather actionable information from open sources.

Google Cloud Threat Intelligence

I developed a deep understanding of how to leverage Google Cloud's tools for identifying, analyzing, and mitigating security threats. The course covered key topics such as monitoring cloud environments for vulnerabilities, utilizing threat detection services, and implementing best practices for cloud security.

LinkedIn Cybersecurity Foundations: Governance, Risk, and Compliance (GRC)

I gained knowledge in managing cybersecurity risks, implementing governance frameworks, and ensuring compliance with regulatory standards.

Linux LFC108: Cybersecurity Essentials

I learned foundational cybersecurity principles, including threat detection, risk management, and secure system administration practices.
